

This Page is from the Daily of Friday, Jan. 20.

The El Paso Link is one of the newest papers that comes to our table.

The product of the Ontario silver mine for three days of this month was \$27,225 assay value.

The Florida orange crop this year is said to be the largest ever grown in the State, reaching not less than 85,000,000 bushels.

Says the New York Tribune: "The brains of the democratic party were always located in the southern wing, and it is the southern democratic statesman who is the first to perceive that the party has no future."

A cyclone in the upper and lower Ojai valleys last Thursday blocked the roads in some places with the trunks of large oak trees and destroyed ten barns and four houses. The storm is said to be the worst ever known in Ventura county.—Los Angeles Commercial, 17th.

It is asserted that silk may be used with great advantage for encasing boilers, as it prevents the loss of heat as well as the ordinary felt coverings. The waste scraps which are found in silk manufactories and establishments, and which cannot be utilized in the trade, can, it is stated, be made up into bands and rolls at a small cost, and sold to the makers and users of boilers at a profit.

There are eight newspapers in the United States which claim to be over one hundred years old. Below are the names of the papers and the dates when they are said to have been established: Annapolis (Md.), Maryland Gazette, 1745; Portsmouth (N. H.) Gazette, 1756; Newport (R. I.) Mercury, 1758; New London (Ct.) Courant, 1763; New Haven (Ct.) Journal, 1767; Salem (Mass.) Gazette, 1768; Worcester (Mass.) Spy, 1770.

In reply to the oft repeated query, "What shall we do with our boys?" an Indiana expert, in a choice bit of satire, solves the enigma as follows: "Build stores, more stores, plenty of stores. The great want of the age and the country is stores, in which the boys can serve as clerks and wear nice clothes and use Lubin's extracts and part their hair in the middle, and brush it often and not disfigure themselves with getting warm and perspiring. All that is needed for the boys are stores and plenty of them. Farming and mechanical pursuits and outdoor labors are all very well, but the boys don't take kindly to them. They like stores where they can earn a beggarly pittance and keep the girls from earning honest living and finding employment not beyond their strength. By all means let us have more stores and more young, stout, healthy men or clerks."

Railway Items.

The Gould system of southwestern roads, having been extended to the Rio Grande by the completion of the International and Great Northern to Laredo and of the Texas and Pacific to El Paso, is now to be pushed to the City of Mexico, a distance of 700 miles.

The work of extending the Texas and Pacific railroad from Fort Worth to El Paso was commenced March 25th, 1880, and in 521 days 521 miles had been laid, completing the road to the junction of the Southern Pacific railroad, about ninety-two miles east of El Paso, at Sierra Blanca. This extraordinary rapid work required about 50,000 tons of steel rails, 2,000 tons of spikes, 4,000 tons of angle-plates and 1,500,000 cross-ties, aggregating 20,000 car loads of material.

Green's construction outfit is laid up at the Overland corral. They are going to Benson, Arizona, to work on a branch railway near that place.

CONSIDERABLE valuable stock stolen from the city Sunday night. Mules and horses unguarded were driven off in a drove, and yesterday Col. Baylor sent a detachment of seven rangers in pursuit of the thieves. It is supposed they will return with them to-night, as they took direct trail from this city into Arizona. Of late there has been an unusual amount of thieving in this vicinity and if it continues the work of a vigilance committee will be needed.—El Paso Link, 17th.

Mr. J. R. Symon, the well known mining expert of San Francisco, visited the new mining excitement at Point of Mountains, seven miles from Wilcox, and expresses himself as being very favorably impressed with the appearance of the new district. Mr. Symon has bonded the Maud S. claim for \$75,000. The specimens taken from this mine are exceedingly rich, resembling the ore from the once famous Bodie mine, and assaying as high as \$1800 to \$2500 per ton.—Citizen, 18th.

Another rain-storm last night.

TELEGRAPHIC.

The Guitane Trial.

WASHINGTON, January 19.—On the opening of the court this morning Guitane arose in the dock and made the usual opening speech with a pompous effort at oratorical effect. After speaking a few minutes he was induced by an officer to sit down, when Scoville resumed his argument.

It is understood that the defense will at the conclusion of Scoville's speech make a motion to allow the prisoner to address the jury and will ask to be heard in support of the motion. The effect of this, if permitted by the court, will be to consume another day. Allowing two days for Judge Porter, and it is more than probable he will require three, the case will hardly get to the jury before Wednesday next.

Waifs from Washington.

WASHINGTON, Jan. 19.—Senator Ingalls will soon answer Beck's speech against the arrears of pension act. He has received many letters and resolutions of thanks for his championship of the cause of the soldier.

The Star route cases have been postponed until to-morrow.

The president may not sign the census deficiency bill, as the first comptroller raises a point against it.

The Senate has passed a bill for the retirement of Judge Hunt.

John H. Hickox, assistant in the library of Congress, has been arrested on a charge of purloining money from letters addressed to parties in the capital.

The fourteenth annual convention of the Woman Suffrage association begins to-day.

The Charges Against Gen. Carr.

GALESBURG, Ill., Jan. 19.—Friends of Gen. Carr here claim that it is absurd to attempt to make the president, instead of the department commander, responsible for Carr's being placed under arrest. They claim that Gen. Carr has not been fairly treated, and that his complaints of his superior commander do not justify his arrest by that officer, for disrespect, which is the gravamen of the charges against him.

The charges are, disrespect, misstatements in complaints to higher authority, disobedience of orders, and misconduct of the Indian campaign. The charges of disobedience and mismanagement, coming four months after they could have been made, seem to be made as a plausible accusation in support of the principal allegation of disrespect. A full investigation of the campaign will show that Gen. Carr performed his responsible and delicate duties as well as could possibly have been done in such unexpected emergencies as those in which he was placed. He himself telegraphed, "I am ready for any kind of trial or investigation." Gen. Carr's brother lives here, and much interest is taken in the case.

Cow-boy Terrorism.

OMAHA, Jan. 18.—A party of ten cow-boys from the up-country rode into Long Pine Tuesday night and took possession of the town. They shot out the lamps in the saloons, riddled the windows, fixtures and walls, and terrorized the inhabitants by firing fully a thousand shots during the night. Finally part of the gang boarded a departing train and continued shooting from the rear platform. The inhabitants were too glad to escape personal injury to think of bringing the ruffians to justice.

New York Legislature.

ALBANY, N. Y., Jan. 19.—The senate appointed a committee to investigate the Sputen Duvill disaster. The house tried six times, ineffectually, to elect a speaker.

Floods in the South.

NEW ORLEANS, Jan. 19.—A flood from the overflow of the Big Black river is spreading in every direction. About thirty miles of the Chicago, St. Louis & New Orleans railroad is under water. Much damage has been done, and travel will be suspended for some weeks. The lower part of the town of Goodman is inundated.

MOBILE, Ala., Jan. 19.—All the lower landings along the Tombigbee are inundated. Fifty feet of water is reported at Tuscaloosa, and still rising.

Railroad Progress in Texas.

HOUSTON, Jan. 19.—A contract has been signed for an extension of the Houston & Texas Central railroad to a connection with the St. Louis & San Francisco road.

The first through freight train from San Francisco to Houston arrived yesterday over the International railroad.

New Mexico News.

DENVER, Col., Jan. 19.—Tribune Santa Fe special: Last week McDonald, who has been scouting along the southern border with twenty scouts for the trail of Nana and his Apaches, crossed the border into Chihuahua, and was arrested by the au-

thorities and taken to the city of Chihuahua for trial, for invasion. Governor Sheldon received information this morning that thirty head of horses and oxen from a freight team, were stolen between Shakspeare and Listendorf Wells, in southern New Mexico. It is not known whether the thieves were rustlers or Apaches.

Calamitous Conflagration.

CLINTON, Mo., January 19.—The house of George Smith, at Lem's, five miles north of here, burned at three o'clock this morning and five of the inmates perished, including Mrs. Smith and four young daughters. The fire is supposed to have started from clothing hanging by the kitchen stove, or from a coal-oil explosion. Mrs. Smith was the first to awaken, when she aroused her husband, who made his escape with the little girl of a neighbor, who was staying there for the night, and one of his own daughters, aged eight.

Bank Failure.

DETROIT, Mich., Jan. 19.—The failure of the People's Bank at Tecumseh promises to be a bad affair. The liabilities are estimated at \$80,000; assets, \$50,000.

Transportation Changes.

NEW YORK, January 19.—The Chesapeake & Ohio, Norfolk & Western, and Seaboard & Roanoke railroad companies have obtained control of the Old Dominion steamship line.

It is understood that the Pacific Mail will not be in the California pool, but after the pool has been formed the Pacific roads will be ready to consult with the Pacific Mail in regard to subsidy.

A Nihilist Sentenced.

NEW YORK, Jan. 19.—Special cables from St. Petersburg say: The trial of Sampurski Melokoff, implicated in the attempt to assassinate Gen. Tchernov, ended in a sentence to twenty years' penal servitude in the mines of Siberia. A dramatic incident took place in the court just before the announcement of the verdict. When Melokoff had finished his flowery, theatrical defense, his father, who had watched the course of the trial, rose excitedly and cursed him.

Items from Honora.

MAGDALENA, Jan. 18, 1882.—Col. Head came in from the Santa Barbara yesterday, and reports the mine improving as the work progresses. The colonel is rather reticent, but an experienced miner, who has been at work in the Santa Barbara, says it is a big thing.

Most encouraging reports also come from Col. Bennett's mine, at the "Pimas," and, judging from the amount of supplies for mining that he is taking there, he means business.

In an interview had with the prefect, yesterday, he informed me that his instructions from the government officials were, to extend to all persons coming in to aid in developing the country, every facility and protection consistent with his duties. This flatly contradicts the slanderous reports put in circulation by designing and unreliable persons, regarding the treatment of foreigners in this country, and their insecurity.

The railroad track is laid twenty-one miles this side of Hermosillo, and grading is completed forty-five miles. They are pushing the road, and in about sixty days the cars will be running into Magdalena.

It has been raining steadily for the last twenty-four hours. This insures an ample supply of water the coming season for all purposes.

National Gastronomy.

All civilized nations have their gastronomic specialties, and each one excels in the preparation of certain table dainties which have become as household words at home, and a lasting memory to its wandering children abroad. The United States are peopled largely by the best elements of all nations, and our western confines are settled in a great degree by the overflow of the overcrowded communities of the older portions of the country. Most of the "emigrants" have brought their home customs with them, and, when opportunity offers, will seek to indulge in those national methods of cooking and the preparation of table delicacies which constituted one of the chief charms of their home life. In the well appointed markets of our Western cities, the foreigner can easily find the wherewithal to revive the gastronomic tastes of his youth, and no one, except the South Sea cannibal, need forego the dainties to which he has been accustomed at home.

No cuisine has so strong a hold upon the affections of those who indulge in it as that of New England. The old-time feasts of that bleak land of plenty have a world-wide reputation, and the annual feast-day, Thanksgiving, but recently the peculiar property of New England, has become national in its observance. If any scold doubts the potency of the table attractions which link the "Down Easters" to the home of his youth, let him partake of the New England lunch which the ladies will serve to-day in the Gird building. The substantial and dainties that each charming "Lady Bountiful" will serve on that occasion, are of a character to convince the most skeptical that a New England kitchen is a good thing for a hungry man to tackle.

A highly respectable young man by the name of C. W. Carter died of heart disease at the Cosmopolitan hotel day before yesterday. The body will be sent to his friends in California.

THE PRECIOUS METALS.

Product of the Pacific Coast States and Territories.

The annual table of the precious metals produced in the states and territories west of the Missouri river, including British Columbia, with receipts in San Francisco by express from the west coast of Mexico, has been made to Wells, Fargo & Co. by John J. Valentine, the general superintendent. The statement shows the aggregate products for 1881 to have been as follows: Gold, \$31,869,686; silver, \$45,077,829; lead, \$6,361,902; copper, \$1,195,000. Total gross result, \$84,504,417.

California shows a decrease in gold of \$579,089, and an increase in silver of \$323,582. Nevada shows a total falling off of \$3,184,057; the yield from the Comstock being only \$1,726,162, as against \$5,312,592 in 1880—a decrease of \$3,586,430. The product of Eureka district is \$4,127,265, as against \$4,639,025 in 1880—a decrease of \$511,760. Utah shows an increase of \$1,672,171; and Arizona, \$3,726,295 over last year. The gold dust and bullion transported by express was \$26,019,223; by other conveyances, \$2,663,940; silver bullion by express, \$25,567,824; ores and base bullion by freight, \$30,253,430, making a total of \$84,504,417. This amount was distributed as follows:

California	\$18,020,679
Nevada	11,847,564
Oregon	1,189,615
Washington	100,963
Idaho	19,000
Montana	4,850,071
Utah	7,311,288
Colorado	22,937,100
New Mexico	814,944
Dakota	3,550,950
Arizona	1,195,000
Mexico (west coast)	\$3,483,343
British Columbia	572,600

The bullion from the Comstock contained 47 54-100 gold and 52 46-100 silver. Of the so-called base bullion from Nevada 44 70-100 was gold; of the whole product of the state 26 53-100 was gold. The gross yield for 1881, shown above, segregated, is approximately as follows:

Gold	\$31,869,686
Silver	45,077,829
Lead	6,361,902
Copper	1,195,000
Total	\$84,504,417

TUCSON ITEMS.

From the Citizen.
A heavy white frost appeared last night, and was visible for several hours after sunrise.

The distribution of gas mains still continues. How our lights will shine when the meters once get under way!

The summits of the highest peaks of the Santa Catalinas, Rincons and Santa Ritas are sparkling with a capping of beautiful snow.

From the Journal.
It is reported that there are a number of counterfeit five and ten dollar gold pieces in circulation in this city. It would be well for parties receiving money to examine pieces of those denominations carefully before taking them.

Mr. W. B. Scott, superintendent of the Santa Catalina copper mines, forwarded yesterday lumber for buildings at the mines, and also for a temporary bridge which they intend building across the San Pedro. About a dozen miners also started for the mines.

From the Daily Star.
O. F. Thornton, Esq., editor of the EPITAPH, is in our city resting from editorial work for a few days. Mr. Thornton is one of the old time newspaper men of the Pacific coast, and possesses an accurate and intimate knowledge of public men and political history. We consider him to be very valuable man for the EPITAPH.

Railroad Projects.

Phoenix Herald, Jan. 17th.
We mentioned yesterday that Messrs. Benson and Morgan passed through Phoenix on Sunday evening for Vulture City and Prescott. They come to make preliminary observations for the course of a railroad from Maricopa to Prescott, via Phoenix.

They expressed themselves as well convinced that the road, to Phoenix at least, can be built very cheaply and easily and we do not doubt that their further observations will prove the route to the north of us equally practicable. The visit of these gentlemen is a matter of special interest to Phoenix. Mr. Benson is well known as an energetic railroad builder of long experience, and Mr. Ben Morgan, formerly of Prescott and now of Tucson, is one of the ablest attorneys in the territory. These gentlemen come as the representatives of eastern capitalists who are able and ready to furnish the means for this enterprise, if these gentlemen find it advisable. We understand that the projected road will be built from Phoenix to Vulture City and thence to Prescott by the most available route.

MR. FOSTER, special guard on the Santa Fe road, had a racket with a bad man at Albuquerque Friday evening. The bad man insisted upon riding on the train without money, and the conductor put him off, using all force necessary, when the b. m. drew his gun and commenced firing at the train. To this Foster responded, firing three shots, the last of which must have been effectual, as the man fell by the wayside. This species of beasts are becoming altogether too common, and they may rely upon a warm reception in this country.—El Paso Link, 17th.

LOCAL SPAINTERS.

CHAS. H. DUNCAN, of Oil City, is registered at Brown's hotel.

ONE minute a day is the rate at which the afternoons are now lengthening.

THE entertainment of the Knights of Pythias on the 11th proximo will be one of the select events of the season.

DENNIS MCCARTY, city assessor elect, qualified yesterday, his bondsmen being W. K. Gird and Chas. Fredericks.

It is announced that Mr. W. K. Leveridge contemplates the erection of an ice machine, to be in operation by the 1st of May.

THE Redpath branch of the Irish Land league have engaged Schieffelin hall for a grand entertainment on the night of the 17th of March.

WE are happy to state that the reported accident to Father Bloise near Contention yesterday on his return trip from Tucson had no foundation.

IN the case of J. H. Jackson vs. the Fairplay M. Co., tried in Judge Wallace's court yesterday, the plaintiff, claiming \$399.99, was allowed \$6.

WELLS, FARGO & Co.'s express shipped yesterday for the Tombstone Mill & Mining company five bars of bullion, weighing 1080 pounds and valued at \$13,296.39.

WE understand that an option of give or take at \$2 per share was recently offered to the Anglo Californian Bank for the controlling stock in the Bob Ingersoll.

COL. J. D. HENDERSON, of New York, arrived by private conveyance last night and has taken parlors at the Grand. The Colonel is engaged in mining business.

Mrs. Richard Gird and Miss Emma Gird arrived in the city yesterday from California, en route for the East. They are the guests of W. K. Gird, Charleston.

PREPARATIONS are being made for the placing in position of the new boiler at the Tombstone company's main hoisting works. This is done merely to guard against delay in case of any flaw occurring in that now in use.

OUR fire bell rang out its first alarm last evening about 7 o'clock. The fire broke out in a little house belonging to Mr. Bayless on Fremont street just below the West End Corral, but a few willing hands and a number of buckets of water vanquished the dreaded foe before the fire department got out and without doing any serious damage.

THE office of the city auditor and clerk of the common council has been moved from the post office to the office of B. C. Quigley, city auditor and clerk, at 305 Fourth street, below Fremont. The situation is very convenient. Mr. Quigley informs us that his office will be open from 8 a. m. until 8 p. m., to accommodate those who may have business to transact before this department of the city government.

ON the 9th of February an entertainment for the benefit of the Catholic church will be given at Schieffelin Hall. The entertainment will consist of a concert and ball. Music, both vocal and instrumental, will be furnished by the best talent in the city, and a screaming farce will be played by the Tombstone Dramatic and Relief Association. Tickets, which can be found on sale at the principal stores, can be had for fifty cents.

WE learn that the Tombstone M. & M. company have received a patent for the Goodenough claim. Those who attended the late trial of that company against the Way Up will remember the strenuous efforts of the defense to defeat the title of the company to that mine. Similar efforts were made in Washington to prevent the issue of the patent, no less than five hearings being had before the commissioner of patents and one before the secretary of the interior. The points involved are of interest to every mine owner in Tombstone, for in this case, as in some other recent cases, the peculiar circumstances of out-crop in this district were used against the application, and the failure of these attempts is an assurance to other bona fide owners that this district is not without the pale of the law, as some interested parties would like to have the authorities believe.

PRESCOTT POINTS.

From the Arizona Miner.
Warrants upon territorial general fund up to and including No. 27, series of 1870, will now be paid by T. J. Butler, treasurer.

THE Mohave stage did not get in last evening until half past ten. The driver, James Wagner, reports the snow as being four feet deep in some places.

THE snow on the Juniper range, on the Mohave route, is over two feet deep, and the buckboard drivers have to get out fifteen or twenty times a night and go prospecting for chloride of buckboard tracks.

FROM information received by letters in Prescott from moneyed men in Iowa, it seems that the mining vicinity about Prescott occupies an important part in their business, and a rush can be expected from that part in the spring. This looks good.

THE number of sleighs on our streets to-day shows how much our people are enjoying themselves.

THE snow-fall is heavy in the San Francisco mountain country, and freighting from the end of the track has stopped.

Murray McInerney took the Verde mail this morning on a sleigh. The snow is fifteen inches deep in the Verde valley.

THERE is a colony of Mormons established on the Moenocopy, north of the Little Colorado, and another near Tenny's Spring, north of the Grand Colorado, both in this county. They are engaged in agriculture and stock raising, the settlement on the Moenocopy having a good flour mill. As far as we are aware, no tax, county or territorial, has been paid by these people for years. Their isolation makes the cost of collection more than the tax amounts to. As a consequence, they enjoy that blissful exemption from one of the ills of life, considered next to death in its certainty. Happy Mormons.

COTTON WEDDING.

Celebration of the First Anniversary of the Wedding of Mr. and Mrs. Chas. Glover.

Perhaps the most successful social event which ever took place in Tombstone was that of last evening at the residence of Mr. Charles Glover, the occasion being the celebration of the first anniversary, or cotton wedding, of himself and wife. The parlors of their elegant residence were handsomely decorated, and the presents were appropriate and unique, being entirely composed of cotton. The wedding ceremony was performed by the Rev. Fred Brooks, and the impressiveness of the occasion brought tears to the eyes of the guests—tears caused by laughter, as it was done in Mr. Brooks' inimitable style. Mr. and Mrs. J. Brown were the attendants. Mrs. Glover was attired in a court train of crimson ombre satin, with an overdress of broad cream-colored satin, and looked most beautiful. After the ceremony the guests indulged in dancing until 11 o'clock, when they sat down to an elegant collation, which was most heartily enjoyed. It was all that could possibly be desired. Dancing was continued until a late hour, and all voted it a grand success in every particular. Among those present were: Mr. and Mrs. G. G. Berry, Mr. and Mrs. Shaffer, Mr. and Mrs. Eccleston, Mr. and Mrs. Harley, Mr. and Mrs. Stewart, Mr. and Mrs. Cook, Mr. and Mrs. Peppy, Mr. and Mrs. Walker, Mr. and Mrs. B. Brown, Mr. and Mrs. J. Brown, Mr. and Mrs. Kelly, Mr. and Mrs. Clark, Mr. and Mrs. Ingersoll, Miss Locker, Miss Thomas, Miss Daisy Clark, Miss Jackson, Miss Mae Stewart, Miss Nita Kelly, Messrs. Joyce, Rule, Fitzherry, Mansfield, Brooks, McJinniss, Lifchield, Smith, O'Connor, Dr. Giberson, Frankie Welker, Downing, Vizina.

Dead on the Road.

Through the courtesy of Prof. Church we are permitted to publish the following extract from a letter from Mr. George W. Cheyney, dated Camp Huachuca, 18th: "We left Charleston about noon, expecting to make Evans camp to-night. About an hour's ride north of this place we came up with the wagon of old Mr. Rigway, a sewing machine agent, and he lying dead on the seat. We could not bring him to by any means in our power, so Frederick Clark got in and drove his wagon, and I followed, bringing him to this place, where the post surgeon tried the battery, but with no effect. An inventory was taken of his effects. He had over \$300 on his person, besides his team, machines, etc. A soldier has been sent to telegraph for the coroner."

District Court.

W. H. STILWELL, JUDGE.
Court convened at 10 a. m. The following witnesses were examined for the plaintiff in the case of Contention vs. Head Center: Chas. Miller, Wallace, S. W. Clawson, Ward Priest; whereupon the plaintiffs rest.

Harry I. Thornton, Esq., opened the case for defendant.

Adjourned until to-morrow at 9 o'clock, a. m.

Short-Hand Reporting.

A full report of the testimony in the important suit of the Contention vs. Head Centre, now on trial in the District Court, is being made by Messrs. Clement Bennett and George E. Maxwell, two of the leading short-hand reporters of San Francisco, who have been especially engaged for that purpose. Mr. Bennett's notes are transcribed into long-hand by his assistant, Mr. K. R. Wilson, to whose tutored ken his employee's hieroglyphics are as clear as letter-print.

THE Red Bluff Republican says a bald eagle was recently killed in that vicinity which measured seven feet from tip to tip of the wings.

NOTICE.

TO J. D. KINSEY—YOU ARE HEREBY notified that we have expended one hundred dollars in labor and improvements upon the Moenocopy mine, of gold bearing ore, situated in the Dos Cabezas Mining District, about two miles north-east of Ewell Springs, in order to hold said premises under the provisions of sections 2282 and 2283 of the Revised Statutes of the United States, and the act of Congress, approved January 21, 1881, mandatory thereof, said mine being the amount required to hold the said mine for the year ending 1882. Now, if within sixty days from the publication of this notice, you fail or refuse to contribute your proportion of such expenditures as a co-owner, you will be held to claim will become the property of the subscribers under the sections of the revised statutes aforementioned.

JOHN McCREGGH,
Dos Cabezas, Cochise County, A. T.

CUSTOM MILL.

To Miners and Mine Operators.

Boston & Arizona Smelting & Reduction Co.

IS PREPARED TO

Receive and Treat, or Purchase Gold and Silver Ores of all Grades, and in Lots of all Sizes, from 100 Pounds to 10,000 Tons.

Parties Having Ore will Do Well to Confer with the Management Before Making Other Arrangements for Milling. Mill of the Company situated at Emery City, on San Pedro River, Three Miles Below Charleston.

GEORGE RICE, General Manager. C. W. GOOD, superintendent.

HENRY'S SPECIFIC!

The Great ENGLISH REMEDY

FOR Nervous Debility, Exhausted Vitality, Spermatorrhoea, Kidney Complaints and all Urinary Troubles.

DR. HENRY, one of the most able physicians of London, says: "I have treated upwards of 40,000 persons with NERVOUS DEBILITY and KIDNEY TROUBLES, and prescribed this remedy; every one being treated successfully; I can claim that an absolute cure is obtained with my specific; I know of no instance of failure, when used as directed."

Price \$1 per Package, or 6 Packages \$5.

Address: WHEELER & CO., 203 East 14th Street, New York.

ROBERT ECCLESTON, FREMONT STREET, TOMBSTONE.

</
